gitTest

Last week, during this game development pipeline, DUFF & Awayzo combined forces to tackle the creative process of game planning.

Decided upon a puzzle solving game with liminal space vibes. Unknown storyline from player perspective, more of the backstory is revealed as the game progresses.

Evidence in Github folder

access

I was the main documenter, transcribing ideas onto the whiteboard. Lexxie is the lead on the project, other members do not have direct titles, but aiding in brainstorming during this first session.

video1

Series of videos, made by Dr. Stalbert, that will aid in our understanding of simplifying the process. Focusing on how to utilize the pipeline method to reach our end result of creating a game.

video2

Video 1 - Game Developer Mindset - Overcoming the Obstacles

\\Game Development, needing the proper mindset (open) - Creativity + Innovation.

---Maintaining a positive mindset and attitude to think inside and outside the box.

---Perseverance to keep eyes on the main goal, long journey ahead.

-Uplifting one another through the storm, fostering teamwork + communication

-Adaptability & Collaboration***

**Enjoying the Development Process

Customer Focus (target audience) - |Key to Success|

Needs of fans/users above everything

Changing the way you think ---> Developing the Growth Mindset (A Process That Takes Time)

\\Embrace challenges, seek out the uncomfortable situations

---Learn from failures, don't be discouraged, analyze them and move forward (grow)

---Focus on Effort : Hard work + Dedication

---Be able to receive feedback/constructive criticism

CS110 / INDEPENDENCE ROAD

---Surround yourself w/ positive role models (inspire and new growth/knowledge)
Keep Learning - Key to developing that growth mindset
>Don't be afraid to try new things
\\Practice as to refine new and old skills

>Technical Challenges - bugs, hardware issues, code structure
\\Strong team with diverse technical skills + testing protocol
---Record keeping to aid in troubleshooting when stuck

>Scope Creep: Don't get carried away with features and new ideas. Stick to the idea and what makes sense within the story.
\\\Need a clear vision from the beginning and proper communication b/w the team
---Marketing and Distribution
---->Knowing the Target Audience<-----

>Funding
>Burnout & Mental Health
__Taking a step away, balancing work and regular life
Community helps ground the nerves and therefore the person
>Stay Motivated
by setting clear goals/task lists w/ deadlines
\\Small and manageable tasks build large components
---Celebrate small wins along the way (keeping morals high)
---Taking small/appropriate breaks

>Staying Organized
\\Keep track of tasks, deadlines, records
___Game Development Document to keep the team in line with the goal and on the same page

>Maintain The Passion
\Supposed to be a fun process

>Collaborate and Communicate x3
\B/w all members of the development team, from "smallest" members to "largest"
\\Proper check-ins

video3
Video 2 - Setup Folder Project
>Easier Management of Project, Better Onboarding for new members or curious people, better collaboration and navigation of files

CS110 / INDEPENDENCE ROAD

Efficiency

video4

Video 3 - Documentation

>Game Development Document

\\Team members, tasks, deadlines, different groups w/in team (specialists)

---Needed resources (applications)

video5

Video 4 - Unity (The Game, Assets, & Resources)

>Using a template as to skip starting from scratch - Core game principle

\\Maintaining proper folders and records/documentations

---Intro to Unity, customizing the template to fit the needs of the story

video6

Video 5 - Custom Player

>Game Development Document (art and sounds file)

\\to provide links for downloading characters (mixamo.com)

opinion

Using resources outside of our own, the public's foundational work to boost our initial development stages, through characters and templates in Unity. There likely is to be an appropriate template that can be used to get our puzzle game started.

What type of character from mixamo is worth importing or taking inspiration from?

questions

Still no proper idea on where the game would even start, opening sequence and backstory. General direction is understood, but the more intricate details are still quite far.

currentPage

57

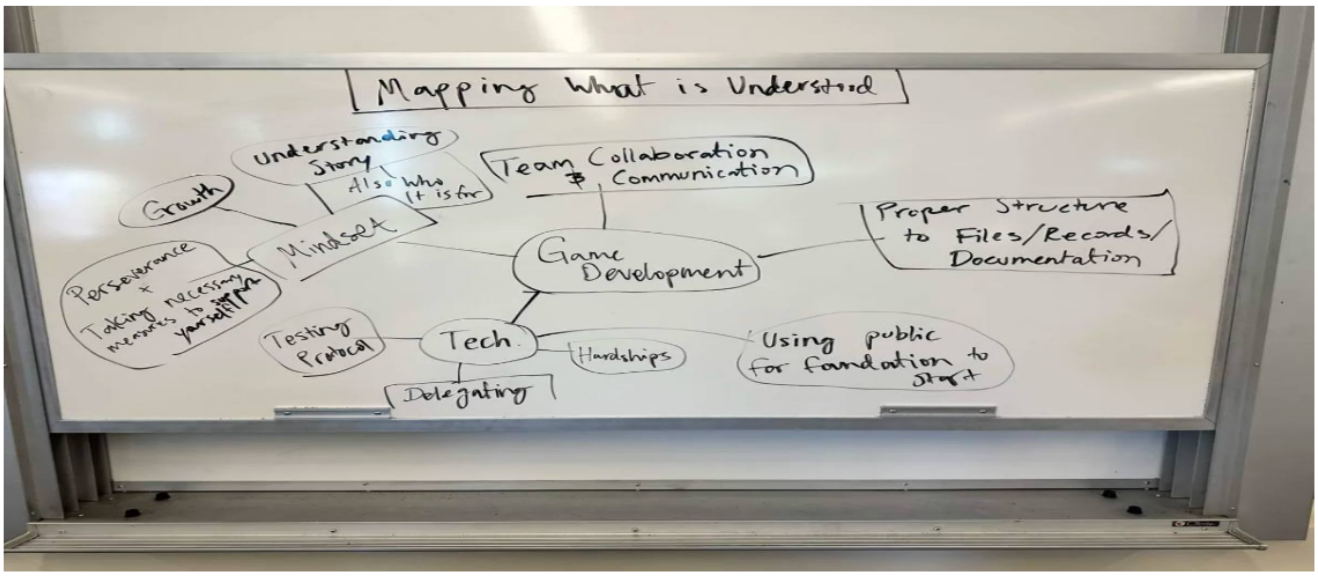

Whiteboard

Seems fairly self explanatory:

Game Development is in the center with all the surrounding pieces.

Most important part that was not included was that it is meant to be fun. If you begin losing the passion and drive, take a step away.

CS110 / INDEPENDENCE ROAD

pitch

understand

Well the finish line is a completed game containing a story and certain components that are beloved by the team of creators.

>As for the work, it is a lengthy process.

-First, attaining the proper mindset to grow and develop.

-Other more logistical components are to keep a master document that can be referenced by all of the team so everyone is in line with the project and its deadlines/tasks. Proper file storage and record keeping.

-It will take facing challenges and overcoming them, learning from failure, to push through to the other side.

-The coding part can be delegated to others, including AI. The truly difficult part is creating a story in which you are the #1 fan.

offer

My contributions to a team, at first glance, are more conceptual and connective.

-Others are more skilled with the technology, but I believe my ideas are sharp and quite helpful in the overall collaboration and story building. In the previous class, I was the main transcriber on the whiteboard of all the brainstorming we did.

Anyone can work with the tech: that can be delegated like I have said. But being able to do the physical world things with a team is what make me valuable to a team. Keeping us in line and in the scope of where our story lies. Uplifting others to share ideas, whether they are appropriate in that moment or not. Team collaboration and proper communication to straighten our path to discovering the story within.

limits

CS110 / INDEPENDENCE ROAD

As mentioned, the technical aspects can be improved. I am familiar with AI usage, but in regards to getting it to code for me, my knowledge is fairly rudimentary.

Aside from that, attaining that growth and developer mindset is still needing improvement. Facing the challenges, learning from mistakes, getting comfortable with being uncomfortable.

availability

2026-11-10 15:00 19:00 Pacific

2026-11-12 15:00 19:00 Pacific

2026-11-09 10:00 13:30 Pacific

Preferred contact: Classroom

Before a different class, I can be on campus for in-person brainstorming/collaboration.

tools

Whiteboard - Feels very comfortable to write ideas on

Computer Lab - PC access is crucial and I can only work on a laptop when away

Discord - Outside-of-class communication

Unity - For once the actual game development comes around

Github - Repository

AI - Useful in many aspects, but for this beginning point, practical as a team member to bounce ideas of off.

aiTool

AI: Gemini

Task: Help with refining our story. Able to help with coding and 3-D application

Verification: Troubleshooting protocol when using code from AI. Running ideas through multiple AI systems to verify one another, that the ideas are sound and logical. Overall, a team assessment to ensure the AI is helping create the story we want and are fans of.

availability

notes

Before a different class, I can be on campus for in-person brainstorming/collaboration.

huddle

mission

A 2-D wave-based game with escalating difficulty as the rounds progress. Online/offline, up to 4 players total.

The main goal is to see how far you can get until the enemies overwhelm you and defeat you.

framework

P2P can be advantageous in the development by guiding us to the end point of where our team wants the game to stand. There is not much of a story to derive from this type of game, as opposed to other single-player, story mode games, but an underlying story to the characters can help immersify the fans.

reuse

The whiteboard, storyboarding process can be a concept that is easily transferable across projects and different stories. Understanding every element of the story is what builds and drives the foundation. It guides where the story will and should end.

boardNotes

Black Ops Zombies arcade was the main inspiration for the game. Different enemies, characters, stories and whatnot, but a 2-d wave-based game that increasing in difficulty. The remaining questions revolve around ui and design; what the enemies and characters may look like

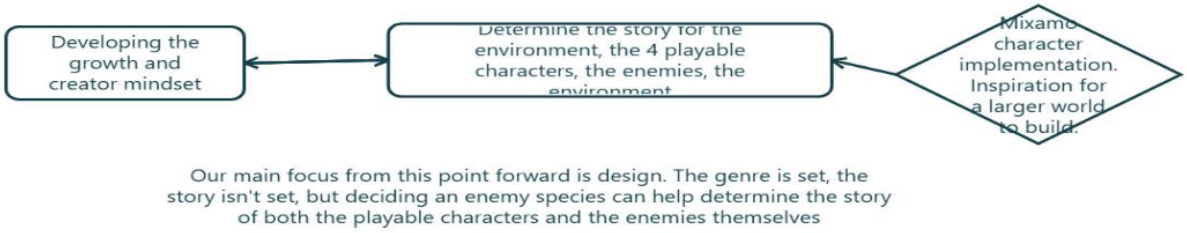

Whiteboard

Focus on design and the story of our characters.

Why are they fighting to survive in this world?

Where even is this world and who the heck are these enemies?

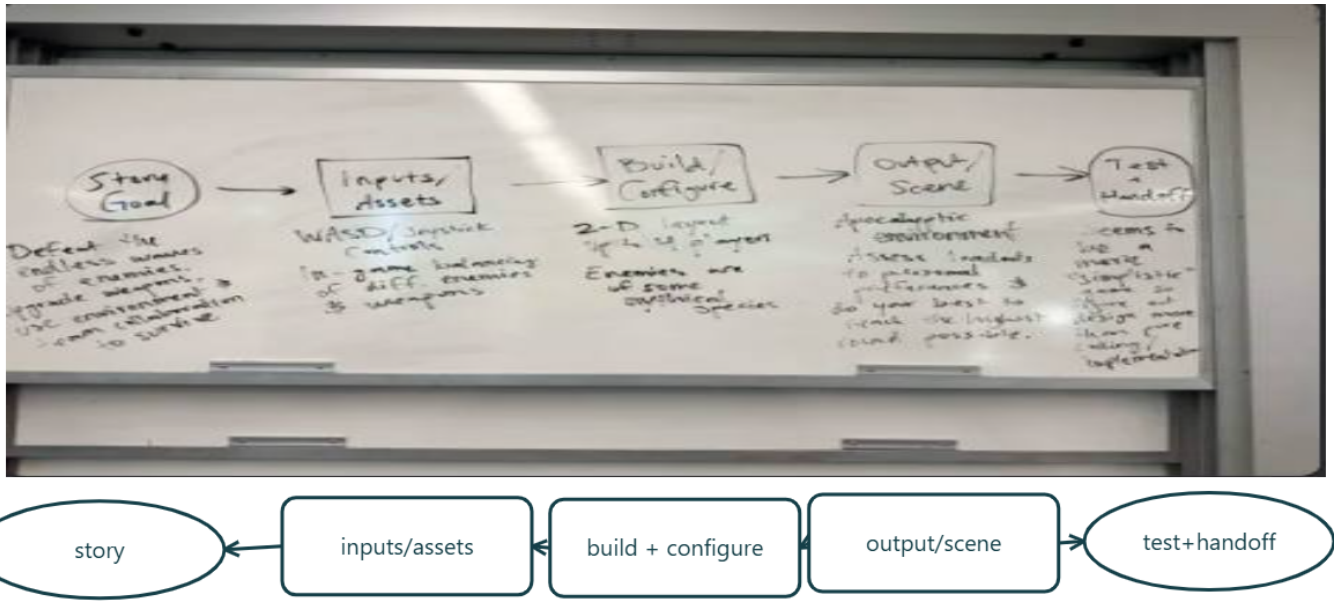

CS110 / INDEPENDENCE ROAD

Our main focus from this point forward is design. The genre is set, the story isn't set, but deciding an enemy species can help determine the story of both the playable characters and the enemies themselves

Whiteboard

Pipeline to get the story to become a reality. Design and being creative with the characters, story, enemies, and weapons should be a main focus.

reportA

checkpoint

Today was a fairly strenuous class and overall lesson. Slowing down the attention span and honing in on one thing at a time. Reading through the extent of the assignment and applying the necessary requirements. Staying way past classmates to show perseverance and overcoming challenges when stuck on difficult sections.

evidence

All documentation and records are contained in my personal github for week 12.

next

Next task for Thursday is to go back to the game we began brainstorming about and progress further. Focusing on that and the team collaboration as opposed to working individually.

Whiteboard

Quick life cycle of the game that was thought of during today's class session

CS110 / INDEPENDENCE ROAD

returnToB

true

dayBReview

recap

My job is to lead the team and direct us to where we are going (no goal in mind)

\\Only worried about understanding/experience

goal

true

owners

true

blockers

true

notes

Managing game development while we continue to work through hardship

reportB

execution

I executed an idea that was integral for the story mode. In regards to the story, all four men (playable characters) have military backgrounds

tests

Our 2D side-scroller game shows the protagonist in the center at all times. That was a deliberate choice in programming.

handoff

CS110 / INDEPENDENCE ROAD

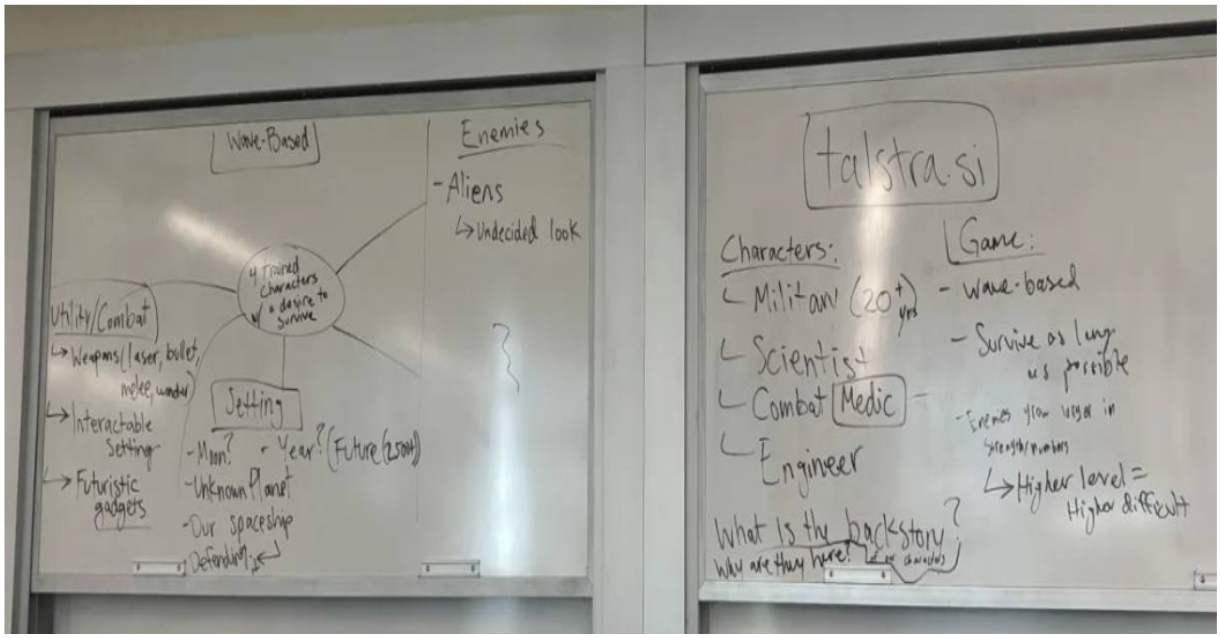

All records are accessible within the Git

reflection

After creating the foundation of what our game is meant to be, the next step is to fine tune the visuals. Having better visuals creates a more captivating scene/environment which guides the user to consume the game at a higher volume than the average game.

Whiteboard

Our diagram of the basic knowledge of what our game will be, the direction, the basis for the storyline (characters,setting,enemies).
