CS110 / INDEPENDENCE ROAD

reportB / David Lopez

Issued: Nov 12, 2026, 3:17 PM Pacific

Record: FORM-18EB99C1D8509DB497102361

Personal public verification code: VIEW-58B88086C24D1EC7948F0B39

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: 02d96e63298c7cf6a18c586d9eecf679f3bc1bcdb0be553b6525c914e45019c9

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

What did you personally execute? Connect completed tasks to files/commits.

I executed an idea that was integral for the story mode. In regards to the story, all four men (playable characters) have military backgrounds

Record setup/import checks, project opens/runs, player configuration/result, and one failure fix retest. Separate observed results from predictions.

Our 2D side-scroller game shows the protagonist in the center at all times. That was a deliberate choice in programming.

Personal GitHub URL/commit, team link if used, project/source paths, PDFs, boards/images, credits and reproduction instructions.

All records are accessible within the Git

Compare the result with the mission. What did you verify, what remains, and what should the team do next?

After creating the foundation of what our game is meant to be, the next step is to fine tune the visuals. Having better visuals creates a more captivating scene/environment which guides the user to consume the game at a higher volume than the average game.

Execution / result

I helped get an idea on what our main setting would be.

reviewedPlan

mission

A 2-D wave-based game with escalating difficulty as the rounds progress. Online/offline, up to 4 players total.

The main goal is to see how far you can get until the enemies overwhelm you and defeat you.

framework

P2P can be advantageous in the development by guiding us to the end point of where our team wants the game to stand. There is not much of a story to derive from this type of game, as opposed to other single-player, story mode games, but an underlying story to the characters can help immersify the fans.

Pipeline to get the story to become a reality. Design and being creative with the characters, story, enemies, and weapons should be a main focus.

tech

Definitely will be using Unity, and even moreso a 2-D template as the foundation. C# with all its variables and functions.

Time code

Classes & components

Class | Responsibility | GameObject

EnemyAI | Determines movement/attack | enemy character/icon

playercontroller | how the user moves and attacks | player character/icon

scoremanager | points tracker to purchase/upgrade | scoreboard on side tallying points

functions

funtion | inputs -> result | when called

player movement | WASD/controller joystick | player moves as intended

Variables / properties

Name : type | Value / purpose | Used by

weapons | multitude of variety with different damage | only the user

communication

reuse

The whiteboard, storyboarding process can be a concept that is easily transferable across projects and different stories. Understanding every element of the story is what builds and drives the foundation. It guides where the story will and should end.

boardNotes

Black Ops Zombies arcade was the main inspiration for the game. Different enemies, characters, stories and whatnot, but a 2-d wave-based game that increasing in difficulty. The remaining questions revolve around ui and design; what the enemies and characters may look like

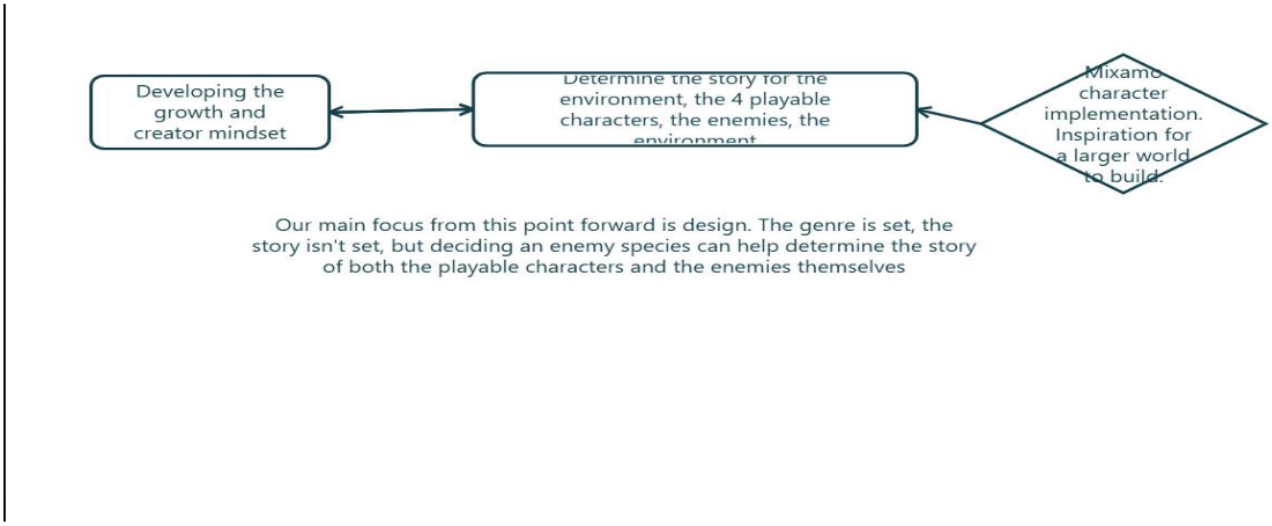

Whiteboard

Focus on design and the story of our characters.

Why are they fighting to survive in this world?

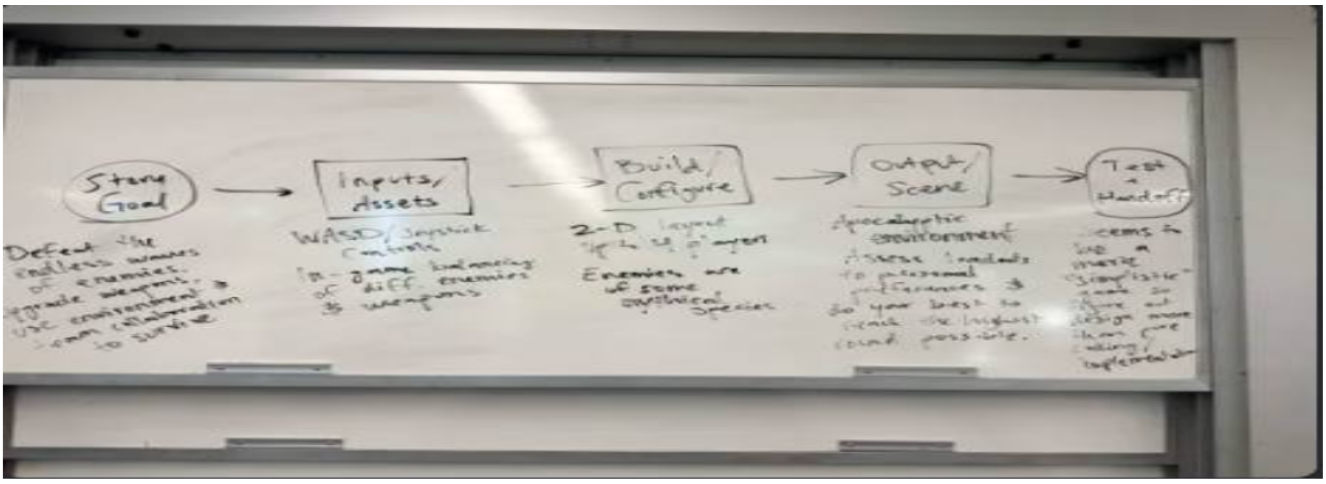

CS110 / INDEPENDENCE ROAD

Where even is this world and who the heck are these enemies?

Whiteboard

Pipeline to get the story to become a reality. Design and being creative with the characters, story, enemies, and weapons should be a main focus.

notes

Managing game development while we continue to work through hardship

recap

My job is to lead the team and direct us to where we are going (no goal in mind)

\\Only worried about understanding/experience
